Complete Integration Solution

Talent Acquisition

Connect your ATS and HCM systems to sync open positions and new hires. Notify your employees of new openings to get referrals. Search and score candidate resumes (from job boards and your ATS).

Onboarding

Get your new employees set up in a click. Automatically move candidate data into HCM. Send documents for signature. Provision apps & devices. Update payroll.

People Ops and Analytics

Quickly and accurately process adjustments to employee roles. Ensure expense data is synchronized with HRM systems to ensure high reimbursement speed and accuracy. Build leave management flows. Reduce business risk with automated time tracking. Connect BI tools to get insights and generate reports.

Offboarding

Completely and quickly remove access when an employee is separated by automating deprovisioning of systems. Update payroll and finance. Eliminate dependency on people to offboard employees reducing risks of data breaches. Send alerts of any issues along the way.
